
13 October 2026 beat spectra · 800 MHz carrier
W / WNS / WNS2 filenames retained; acquisition settings not yet identified
Recorded RF power; WNS2 has a wider RBW
Displayed power (dBm)
Offset from displayed carrier peak (kHz)
Line heights at native RBW; 2.54 kHz display spacing
Carrier-relative level (dBc)
Offset from displayed carrier peak (kHz)
Approximate broadband comparison; not a phase PSD
Relative level − 10 log₁₀(RBW/Hz) (dB)
Offset from displayed carrier peak (kHz)
300–400 kHz shoulder and isolated +252 kHz feature
Relative level − 10 log₁₀(RBW/Hz) (dB)
Offset from displayed carrier peak (kHz)
0W · RBW 3 Hz
0WNS · RBW 3 Hz
0WNS2 · RBW 10 Hz
Positive-peak detector, one sweep; all files flag an incomplete sweep. Nominal RBW correction omits ENBW and detector bias.
