
Measured RF beat spectra: each carrier aligned to zero offset
All traces: positive-peak detector, one sweep, incomplete-sweep flag. Dots show actual display samples.
Absolute levels; RF levels and RBWs may differ
Native trace level (dBm)
Offset from displayed carrier (kHz)
Previous 1×: RBW 1 Hz
Previous 4×: RBW 1 Hz
Latest 8× / new filters: RBW 10 Hz
Close-in pedestal: latest trace has 359 Hz spacing
Native trace / carrier (dBc)
Offset from displayed carrier (kHz)
Previous 1×: RBW 1 Hz
Previous 4×: RBW 1 Hz
Latest 8× / new filters: RBW 10 Hz
Wide-span sidebands; native RBWs retained
Native trace / carrier (dBc)
Offset from displayed carrier (kHz)
Previous 1×: RBW 30 Hz
Previous 4×: RBW 30 Hz
Latest 8× / new filters: RBW 10 Hz
Approximate broadband density comparison
Carrier-relative level − 10 log₁₀(RBW/Hz)
Offset from displayed carrier (kHz)
Previous 1×: RBW 30 Hz
Previous 4×: RBW 30 Hz
Latest 8× / new filters: RBW 10 Hz
Not calibrated phase noise; narrow-line heights are RBW dependent.
