
October 11: /160 versus /40, FALC gain reduced for /40
Both I/Q records: 1.92 MS/s, 0.521 s, 7.32 Hz Welch bins
Apparent unwrapped phase: winding count is ambiguous
Phase PSD (rad²/Hz)
Fourier frequency (Hz)
1× phase gain
4× phase gain
Complex-envelope PSD does not require unwrapping
Folded envelope PSD (dB/Hz)
Offset frequency (Hz)
Solid: full I/Q; dotted: amplitude normalized
Power normalized to total recorded envelope power
Direct angle unwrapping: not a proven optical slip count
Apparent unwrapped phase (turns)
Time (s)
Recorded AM includes pre-arctan vector averaging
Fractional AM PSD (1/Hz)
Fourier frequency (Hz)
