
New narrow beat spectra: 1 Hz RBW/VBW; 273 Hz display spacing
1–10 kHz median display level: FPGA −43.45 dBc, ADF −38.84 dBc
Matched RBW, span, attenuation and display spacing
±5 kHz lines: FPGA lower by 16.3–16.5 dB
+47 kHz family persists in both
New FPGA narrow
New ADF narrow
Displayed level relative to carrier (dBc)
Offset from each displayed carrier (kHz)
AM and PM are combined. Display statistics are not integrated RMS phase noise. All source files carry an incomplete-sweep warning.
