
Phase drift and fast amplitude dynamics are distinct
FPGA: 5 kHz low-pass phase, all resolved records
PLL: 5 kHz low-pass phase, all resolved records
Record
Phase about record mean (turns)
Time (ms)
Example quiet capture 2: fast phase motion
Example quiet capture 3: fast phase motion
Phase (rad)
Time within 150 µs excerpt (µs)
Fractional beat amplitude (%)
Time within excerpt (µs)
Phase sign corrected for the PLL capture's second Nyquist zone. Upper panels have different vertical scales.
Examples were selected by small slow phase drift; the full resolved batch remains in the spectral comparison.
